Guests: Darren Griffiths (DG), Senior Engineer, NYCC Highways and Councillor Richard Musgrave (RM)

664. Apologies: Trevor Britain (TB). Reason for absence approved.

Item No.	Discussion	Action by	Due Date
665	**To decide on further action regarding the proposed installation of chicanes in the village in order to slow traffic** Following the previous consultation meeting held with members of the public, the PC, DG and RM at 8.00pm and having considered everyone's comments and feedback a further discussion was held with DG and RM to explore the various options. Whilst there had been many useful comments (which were all noted), everyone who attended the consultation appeared to welcome the fact that some traffic calming measures were needed in the village. No-one present disagreed with the chicane proposal. If the proposal was to go ahead, DG informed the PC that the chicanes would not be installed until after March, due to current workload. JM thanked the guests for their attendance and expert knowledge and the guests then departed at 9.10pm. A further discussion ensued between the Parish Councillors and after final deliberations, it was unanimously agreed to go ahead with the installation of two sets of chicanes, with reflectors, at the north and south entrances to the village. In addition, it was agreed that appropriate warning signs would be installed to ensure motorists had sufficient warning when entering the village. It was decided not to go ahead with a temporary arrangement of cones but to ensure the design was right in the first place. However, the PC decided to request the cost of dropped bollards, which would allow farmers with extra wide vehicles to travel through the village. A further meeting was to be arranged between DG and the farming community to discuss their specific needs. DG and RM were to be informed the project was to go ahead and to request information from DG regarding next steps. **Meeting closed at 9.25pm**	SW SW	Asap Asap
